**Green Fuel Technologies, Premier Mechanical Corporation  
Retrofit Phoenix Housing Community With Solar Energy Products**

**(Phoenix)**- Green Fuel Technologies Inc., one of the Valley's leading alternative energy companies, has partnered with Premier Mechanical Corporation and the City of Phoenix to add energy efficient solar technology at the Paradise Village Affordable Housing Project. The 62-unit complex, located off of Bell Road and SR 51, has been completely retrofitted with renewable energy technology and other energy saving products.

Termed the Paradise Village Solar Demonstration Project, the goal is to reduce energy costs among low to middle income residents. Green Fuel Technologies installed solar hot water panels, photovoltaic roof panels and solar exterior lighting. The energy saving products have enabled the complex's low-to-middle income residents to save in electric bills.

"These types of upgrades make a big impact on the residents and engages them to be a part of the Green Movement," said Green Fuel Technologies CEO John Casey. "Renewable energy solutions are key investments that control future Facility O&M costs, Allowing future subsidized living facilities to operate efficiently and assist more families in need."

The construction began in October and is now complete with all 62-units including weatherized technology and Energy Star gas and hot water heating. Fifteen units include photovoltaic (PV) solar panels with eight of those units also including solar thermal water technology.

"Tenants can are now equipped with cost-effective and environmentally beneficial products that empowers them to participate in sustainable efforts." said Joe McQueary, Project Manager for Premier Mechanical Corporation. "We look forward to the opportunity to work with the Green Fuel Technologies and the City of Phoenix on other such worthwhile projects."
